ACADEMIC PROJECTS

Currency Converter (HTML + CSS + JavaScript)

- Developed a responsive converter for 150+ currencies with live rates, one-click swap and country flags.
- Integrated free REST APIs for rates and flags using fetch and async/await, with dynamic DOM updates.
- Achieved a fully client-side, zero-cost app in vanilla JavaScript: no backend, API key or framework.

Rock Paper Scissors Game (HTML + CSS + JavaScript)

- Built an interactive, responsive browser game where players compete against a computer opponent.
- Implemented game logic in JavaScript with randomized computer moves and instant win, lose or draw results.
- Added live score tracking for player and computer, updating the UI instantly through DOM manipulation.

Universal Ticket Booking System (Java + OOP)

- Engineered an OOP-based Java booking system covering movies, flights, trains, concerts, sports and hotels.
- Built real-time inventory tracking with overbooking prevention, smart keyword search and revenue reporting.
- Added runtime admin controls, crash-proof input validation and a 50+ ticket dataset for instant testing.
